

# The Technology Resource Center

**St. Luke  
Catholic School**

## Internet Safety

### Recycling Pays Off

Over the last several years the school has been involved in the recycling of used printer cartridges and cell phones through the Funding Factory. In return for collecting and recycling these items, St. Luke earns points that can be used to purchase supplies and equipment. Over the years, the school has been able to obtain over \$6,000 worth of items. Currently the school ranks 27th out of 9,594 schools when it comes to the number of items recycled. If you have any cartridges or cell phones to recycle please send them to the school.

**Thank You!**

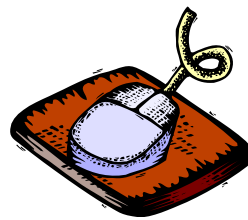

### Internet Safety Sites

stopthinkconnect.org  
staysafeonline.org

Recently, St. Isidore, the Patron saint of the Internet (played by Mr. Morter), paid a visit to the moms group that meets after Mass on Tuesday mornings. The topic of discussion was Internet safety. Those in attendance were presented with St. Isidore cards which contained a prayer to say before logging on and five tips for Internet safety. All given a copy of An Examination of Your Internet Conscience. St. Isidore told them that the school is emphasizing the im-

portance of students playing it safe, when using the Internet as well as the importance of how your behavior online has an impact upon others.

Further activities will be taking place within the school emphasizing the importance of the responsible use of the Internet.

### Thanks To

Father Terry  
Josh Adams  
St. Luke Parish  
The St. Luke PTO

The individuals and groups mentioned above, played a huge role in the improvement and upgrading of the technology resources available at St. Luke School. See more information about the status of technology on the back .

## Would you like to learn more about Smart Boards?

If you would like to find out more about the use of technology at St. Luke School, you may contact the Technology Resource Center at

426-1733 Ext. 430 to schedule a time to come in and see what the school has to offer.
